

WHAT YOUR DONATIONS CAN DO

Providing the best possible start to life for seriously ill and premature babies cared for at Mater.

\$370

can provide a neonatal researcher with their 'must-have' piece of equipment for any lab experiment they undertake—a **pipette**.

\$110

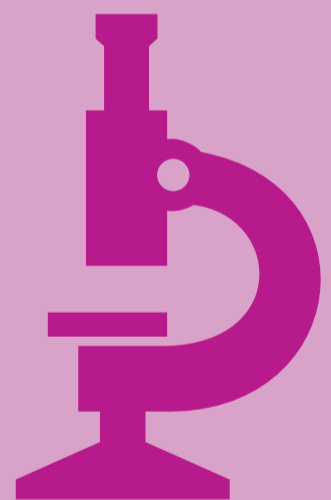

can give a father from outside of Brisbane **emergency accommodation** so he can be close to his partner and baby.

\$62

can help create a special **memory book** for parents who have sadly lost their baby.

\$37

can pay for an hour of a **research assistant's time** to explore better ways to support mothers and their babies.

Together with your school, you have the power to **Make A Difference** to the many families being looked after at Mater—ensuring their tiny babies grow up to be beautiful, happy and healthy children.

SHADE IN AS YOU FUNDRAISE
